Grifols Statement United States District Court Issues Preliminary Injunction against Plasma Ban by U.S. Customs and Border Protection

Sept. 19, 2022

Grifols celebrates the U.S. District Court's decision to issue a preliminary injunction against the U.S. Customs and Border Protection's (CBP) ban on plasma donations by Mexican nationals entering the U.S. on a B-1/B-2 visa. The decision is good news for the patients in the U.S. and worldwide who depend on the lifesaving medicines made from plasma. Grifols welcomes back all qualified Mexican donors to our donation centers and thanks them for their contribution to the vital supply of plasma, so critical for public health.
